

Study Guide - Statements

A statement can consist of a single line of code that ends in a semicolon, or a series of single-line statements in a block.

Examples

- `int i;`
- `string s = "Hello World";`
- `i++;`
- `CheckForThreeInARow(button1, button2, button3);`

Not Statements

- `if (a < b)`
- `total + 10`
- `"There is " + dollars + " in my lunch account"`
- `score`
